Throughout the years we have been striving to satisfy the needs of our customers. Fortunately, with the efforts of our professional staff, we were able to achieve that task.

Our company has been legally established in Beirut, Lebanon in year 2000. Before that, we had started with our family Business in 1950. In 1996, our company went independent and started to represent "Grass", one of the best producers of Drawer slides, hinges and flap systems. A.T.E. started to represent "Egger" from year 2000 till 2008.

We pride ourselves with being one of the leaders in the world of kitchen accessories, wardrobe accessories, upholstery accessories and wooden panels.

We always look for the satisfaction of our customers and our close relation with them. This

made us successful, and for that reason, we strive to solve any technical problem they may face in terms of manufacturing or service after sales.

We have recently started our venture in the UK to offer the customers the same quality of services with the same products that you will be seeing on our website. We will be offering the market the best quality with competitive prices.
